Stumper 3500

The New Level of Performance Stump Grinding

The Stumper 3500 gives you maximum PTO stump grinding durability without outriggers. The 3500 has the power to grind stumps on any terrain your tractor can reach.

Specifications

- 12" Cut Depth per Pass
- 36" Dia. Cutting Wheel
- 1200 lb. Weight
- 72"L x 44"W x 51"H
- 60° Swing Angle
- 24" Below Ground Cut Depth

TRACTOR REQUIREMENTS

- 45-90 HP Recommended
- 540 RPM PTO Speed
- Category II 3-Point Hitch
- 2 Hydraulic Valves

Easily Operated, Heavy-Duty Solution

To install the 3500, simply hook up the standard 3-point hitch, PTO shaft, and 4 hydraulic hoses. This permits complete operation from the seat of your tractor.

- NO modifications to tractor hydraulic controls
- NO electrical connections

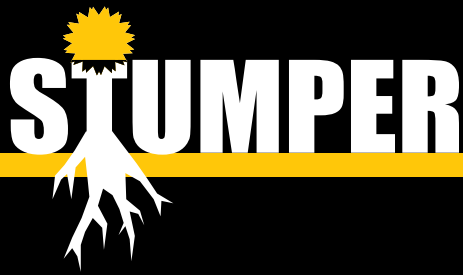

Innovative Design for Maximum Durability

By eliminating complex gearboxes and utilizing self-aligning sealed bearings, the 3500 keeps you grinding—not repairing. Increase the versatility of your tractor by adding the speed and strength of the Stumper 3500.

HEAVY DUTY CONTRACTOR GRADE 280 TO THE COMPACT 220

WE'VE GOT YOU COVERED

Maximize Your Investment

You Already Have the Power—Now Get the Tool!

The Stumper 200 Series gives you stump grinding design innovations supported by a quarter century of experience. Simple installation to your skid steer combined with ease of operation, great visibility, ruggedness, and strength provides you with the most cost-efficient stump grinders available. Get more leverage on the skid steer you already own: Put the Stumper 200 Series to work generating profits for your business.

Easy On, Easy Off

To install the Stumper 200 Series, simply connect two hydraulic hoses and the standard skidsteer quick attach. Operation of the Stumper 200 Series couldn't be easier—simply use the controls from the seat of your skid steer.

- **NO electrical connections**
- **NO hydraulic cylinders**

Grind and Move On

Utilize the skid steer you already own by adding the speed and strength of the Stumper 280. For even more versatility, go with the Stumper 220 to utilize both your excavator and skid steer for lighter duty stump removal.

Once installed on your skid steer or excavator, the Stumper 220 can grind any stump within reach. The powerful and precise Stumper 280 can consume a 12" stump in minutes within 6" of buildings or fences.

STUMPER 220

The versatile Stumper 220 brings reliable stump grinding technology in a compact design compatible with both standard skid steers and excavators in a cost-efficient package best suited to standard or occasional use.

Specifications

- 6" Cut Depth per Pass
- 22" Dia. Cutting Wheel
- 375 lb. Weight

REQUIREMENTS

- Fits Skid Steer Quick Attach
- Standard Model: 11 - 17 GPM
- High-Flow Model: 15 - 22 GPM
- Excavator or Mini Mount

STUMPER 280

The contractor grade Stumper 280 is the perfect fit for heavy duty landscaping with its powerful grinding technology and innovative design. Maximize your skid steer investment by adding the speed and strength of the Stumper 280.

Specifications

- 8" Cut Depth per Pass
- 28" Dia. Cutting Wheel
- 650 lb. Weight

REQUIREMENTS

- Fits Skid Steer Quick Attach
- Standard Model: 15 - 25 GPM
- High-Flow Model: 26+ GPM
- Excavator or Mini Mount
